RADIOLOGIC REPORT

Case ID: 20250918x0001
Patient: Man, Choco Mucho
Source: Referral
Physician: Dr. Edemar Pablo
Request Date: 9/17/2025
Exam Type: Ankle
Service: xray

FINDINGS:

Normal bone alignment is maintained.

No acute fracture or dislocation is identified.

Joint spaces are preserved.

Mild soft tissue swelling noted over the lateral malleolus.

No radiopaque foreign body.

No evidence of osteochondral lesion.

IMPRESSION:

No acute osseous abnormality.

Mild lateral soft tissue swelling, suggestive of ankle sprain.

Correlate clinically for ligamentous injury.

Mary Ann, Cruz (Radiologic Technologist)

Dr. Kathleen Kaye P. Justo-Singson (Radiologist)
